

Fibre Optic Stars

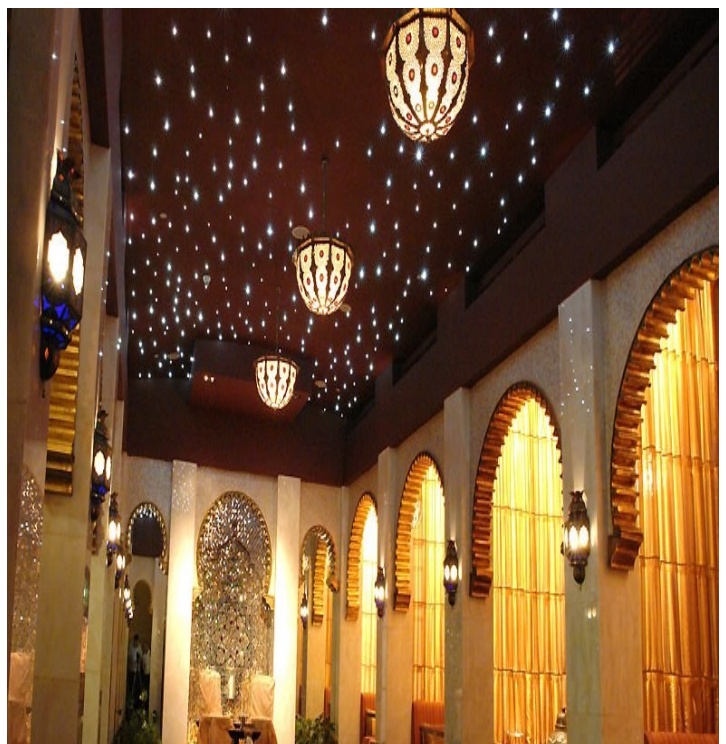

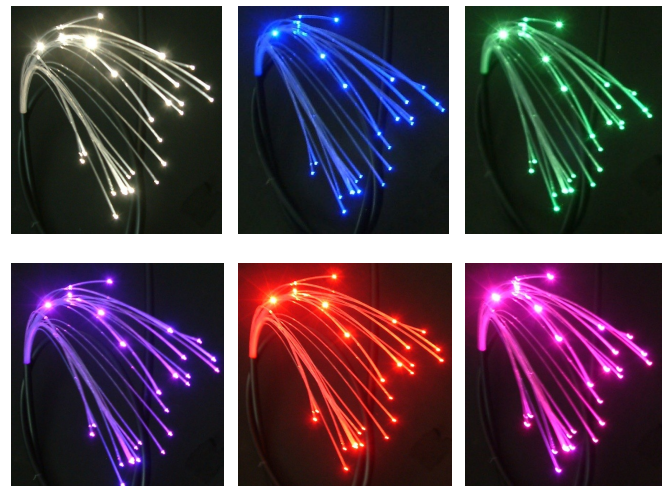

Stretch Ceilings is proud to offer the latest in fibre optic lighting solutions to provide the ultimate in mood and starry sky effects.

Solid experience and product awareness in Stretch Ceiling Lighting allows us a unique insight into what is best suited to be installed through the Stretch Ceiling material, with no effect on ceiling life expectancy.

We have developed fibre ends with the most secure ceiling termination heads (1.5 to 7.0mm), which do not adversely affect the membrane's appearance or capabilities.

Stretch Ceilings new unique systems is fitted with the following characteristics:

- Long life compact light source LED powered unit far superior to the quickly becoming obsolete hot halide or tungsten halogen lamps prone to premature failure
- No fan or colour wheel motor noise, cool operation
- Single unit power supply with low running cost
- Combinations of fibre optics produce 'near and far' star effects
- Fibre density tailored to suit your individual requirements with multiple units in sync via DMX
- 3 cycle speeds with 7 colours; white, red, orange, jade, green, cyan, and blue, or set on any colour desired
- PMMA Megalon sheathed fibre optics with bespoke harness preventing light spill
- Various fibre lengths available (up to 12.7m)
