

THE FLOWER BOWL ENTERTAINMENT CENTRE

1100 Square Metres – Matt White Stretch Fabric

Stretch Ceilings were delighted to have been selected to install approximately 1100 square metres of Matt White Stretch fabric in the new Curling Rink at the Flower Bowl and a further 130 square metres of printed Stretch fabric in the Restaurant area of this newly built Entertainment Centre near Preston.

The pristine flawless effect of this stretch product allows for an instant, high quality finish to be achieved. Creating individual vaulted curves in the Curling Rink, our ceilings can be formed to shape and are perfect for more unusual and challenging areas.

Within the restaurant our next generation of illuminated full colour digitally printed imagery adds colour and fun to provide an interesting visual to the area.

Stretch Ceilings are lightweight, quick and clean to install with no further decoration necessary, making the on-site time for projects much more condensed and cost-effective.

With no on-site waste the ceilings are ideal for internal application. The product is washable, hygienic, non-toxic, 100% recyclable with a Class 0 fire rating. Readily available in over 250 colours and finishes, including those with acoustic qualities, our ceilings come with a 12 year guarantee and we have the expertise to create unique ceilings, wall designs and features.
